EDUCATION

New Jersey Institute of Technology

Bachelor of Science in Computer Science

Newark, NJ

August 2021 – May 2025

PROJECTS

TheoForge (NJIT Capstone) | *Python, FastAPI, PostgreSQL, OpenAI*

- **Backend API Development:** Contributed to a **five-person team**, developing **FastAPI** endpoints for user management, guest sessions, and AI processing within a **Docker Compose** development environment.
- **AI Document Processing:** Integrated **OpenAI APIs** into a **PDF-processing workflow** to extract entities, attributes, and relationships, normalizing the results into structured JSON for downstream knowledge-graph processing.
- **Authentication & User Roles:** Implemented account registration and login with **bcrypt password hashing**, expiring **JWTs**, and user/admin role assignment to support authenticated application access.
- **User & Guest Data Management:** Built asynchronous **SQLAlchemy** operations for user profiles, guest sessions, and conversation histories, using database commits, rollbacks, and error handling to manage persistence.
- **Database Schema Migrations:** Used **Alembic** and **PostgreSQL** to evolve guest-session schemas, including JSONB interaction histories, array fields, and engagement-status enums, with upgrade and downgrade migrations.

Coup Game (CoveyTown) | *TypeScript, Node.js, React, Socket.IO, Jest*

- **Multiplayer Backend:** Co-developed a **four-player** Coup extension in a **two-person team**, implementing seven game actions, turn validation, coin management, and player elimination using **TypeScript** and **Node.js**.
- **Real-Time Integration & Testing:** Connected **React** gameplay controls to server-side logic through **Socket.IO**; wrote **Jest** tests for game actions, player lifecycle, command handling, and client state updates.

PeakFit Workout Tracker | *Kotlin, Firebase Auth, Firestore, Retrofit*

- **Authentication & Data Persistence:** Developed the app's data layer within a **five-person team**, implementing registration, login, custom workout CRUD, and routine storage using **Kotlin**, **Firebase Authentication**, and **Firestore**.
- **Exercise API Integration:** Integrated an external exercise **REST API** using **Retrofit** and **Kotlin coroutines** to populate Firestore with exercises, supporting workout discovery by type, muscle group, and difficulty.

Proxmox Homelab Infrastructure | *Proxmox VE, Debian, Docker, Caddy, Uptime Kuma*

- **Virtualized Service Hosting:** Deployed five LXC containers and VMs on Proxmox VE, separating Minecraft, game-management, utility, and media services into dedicated workloads.
- **Networking & Monitoring:** Configured Caddy as a reverse proxy for web services, router port forwarding for public Minecraft and Valheim servers, and Uptime Kuma to monitor service availability.

WORK EXPERIENCE

Technical Support Specialist

September 2026 – Present

Hanwha Vision America | Product Troubleshooting, Technical Support

Teaneck, NJ

- **Installer Product Support:** Support installers by consulting product documentation, troubleshooting product questions, and escalating issues beyond my support tier.

Administrative Assistant (Website & IT Support)

June 2025 – August 2026

Jag & Son Construction | WordPress, HTML

Kearny, NJ

- **Appointment Intake Workflow:** Created a WordPress appointment-request page with an HTML form, allowing customers to submit their information online without an initial phone call.
- **End-User IT Support:** Assisted with Windows updates, storage cleanup, and troubleshooting office computers experiencing routine issues or slow performance.
- **Customer Operations:** Scheduled appointments and prepared estimates and contracts for customers.

TECHNICAL SKILLS

Languages: Python, Java, Kotlin, JavaScript, TypeScript, SQL, Bash, C/C++

Frameworks & Libraries : FastAPI, Node.js, Express, React, REST APIs

Databases & Storage : PostgreSQL, MongoDB, Neo4j, Qdrant, Firebase Firestore, MinIO

Tools & Platforms : Docker, AWS EC2, GitHub, GitHub Actions, Firebase, pgAdmin, Jira, Alembic, JWT

Other: HTML/CSS, MATLAB
